EDUCATION

Vellore Institute of Technology BTech. Electronics and Communication Engineering: CGPA- 8.35	Vellore, India 2022 – 2026
Prince Srivari Vidyalaya - CBSE Senior Secondary (XII) : 94.4% Secondary (X) : 93.2%	Chennai, India 2021 2019

WORK EXPERIENCE

AI Intern Zoho Corporation Pvt. Ltd. Project: Enterprise-Ready AI System for Infrastructure Knowledge Retrieval & Monitoring GitHub - Developed a production-grade AI assistant using RAG architecture with multi-LLM support (GPT-4o, Gemini, Groq) and smart framework orchestration (LangChain, LlamaIndex, AutoGen, CrewAI). - Engineered a flexible vector store layer (FAISS, ChromaDB, Qdrant) for high-speed, domain-adaptable knowledge retrieval. - Implemented full observability - live tracing, usage metrics, and cost tracking, via OpenTelemetry, Prometheus, and Site24x7.	<i>May 2025 - Jun 2025</i> Chennai, India
--	---

SKILLS

Languages: Python, C++, Bash
Frameworks: FastAPI, Flask, TensorFlow, PyTorch, Scikit-Learn, Streamlit, Numpy, Pandas
AI/LLM: LangChain, LlamaIndex, AutoGen, CrewAI, CleanLab, spaCy, NLTK
Infra & DevOps: Docker, Docker Compose, Nginx, AWS, Prometheus, OpenTelemetry, Site24x7
Tools: Git, GitHub, Kafka, WebSockets, VS Code,
Strengths: Distributed Systems, Observability, ML Pipelines, System Monitoring, Cross-functional Collaboration.

PROJECTS

Real Time Driver Drowsiness Detection GitHub - Developed an AI-based fatigue detection system for real-time monitoring of drivers. - Implemented facial recognition, blink detection, and head movement analysis for 97% accuracy. - Optimized deep learning models for Raspberry Pi, reducing latency to <100ms.	<i>Jan 2025 - Apr 2025</i>
Materials Property Predictor GitHub - Built a full-stack system using PyTorch ANNs to predict material properties from chemical composition. - Engineered end-to-end ML pipeline: Matminer feature extraction (132 features), Monte Carlo dropout for uncertainty quantification, and Redis caching for optimized inference. - Deployed scalable FastAPI backend with Streamlit frontend via Docker Compose, achieving real-time predictions.	<i>Jul 2025 - Sep 2025</i>

RESEARCH

Deep Learning for High Energy Physics (In Progress): - Developing optimized deep learning models for particle physics data analysis using Graph Neural Networks (GNNs). - Implementing CUDA-accelerated training pipelines for large-scale datasets with distributed computing strategies. - Collaborating on GNN architectures for particle interaction modeling and event classification in high-energy physics.	<i>Sep 2025 - Current</i>
---	---------------------------

EXTRACURRICULAR & LEADERSHIP

Winner - Ideathon by Apple Developers Group (VIT)	<i>Sep 2022</i>
Winner - Vellore District Women's Football Tournament	<i>Mar 2023</i>
Co-Secretary of Society for Industrial and Applied Mathematics	<i>Aug 2025 - Present</i>
Bharatanatyam Dancer	<i>15+ Years of Experience</i>

CERTIFICATIONS

AWS Certified Cloud Practitioner CERTIFICATE	<i>Aug 2024 - Aug 2027</i>
---	----------------------------
