EDUCATION

Vellore Institute of Technology
Btech - Electronics and Communication Engineering
CGPA: 8.35

Vellore, India
2022 - 2026

WORK EXPERIENCE

AI Intern May 2025 - Jun 2025
Zoho Corporation Pvt. Ltd. Chennai, India
Project: Enterprise-Ready AI System for Infrastructure Knowledge Retrieval & Monitoring | [GitHub](#)

- Developed a production-grade AI assistant using RAG architecture with multi-LLM support (GPT-4o, Gemini, Groq) and smart framework orchestration (LangChain, LlamaIndex, AutoGen, CrewAI).
- Engineered a flexible vector store layer (FAISS, ChromaDB, Qdrant) for high-speed, domain-adaptable knowledge retrieval.
- Implemented full observability - live tracing, usage metrics, and cost tracking, via OpenTelemetry, Prometheus, and Site24x7.

SKILLS

Languages: Python, C++, Embedded C, SQL, Bash
Frameworks: FastAPI, Flask, React, Tailwind, TensorFlow, PyTorch, Scikit-Learn, Streamlit
AI/LLM: LangChain, LlamaIndex, AutoGen, CrewAI, CleanLab, spaCy, NLTK
Infra & DevOps: Docker, Docker Compose, Nginx, AWS, Prometheus, OpenTelemetry, Site24x7
Tools: Git, GitHub, Kafka, WebSockets, VS Code, PyCharm
Strengths: Distributed Systems, Scalable API Design, Observability, ML Pipelines, System Monitoring, Cross-functionalCollaboration

PROJECTS

Smart Traffic Monitoring and Control System | [GitHub](#) Sep 2024 – Nov 2024

- Developed an AI-powered system tailored for Indian cities using YOLOv8 for multi-class vehicle detection and congestion prediction.
- Integrated Indian license plate recognition, and emergency vehicle prioritization.
- Implemented Kafka-based message queue and adaptive signal timing using ML models.

Personal Finance Assistant | [GitHub](#) Nov 2024 – Dec 2024

- Built a full-stack AI platform with FastAPI and React for expense prediction, anomaly detection, and budget optimization.
- Incorporated Indian financial ecosystem support: UPI detection, cost-of-living analysis (5+ cities).
- Deployed via Docker & Docker Compose with Redis, Celery, and Prometheus-based monitoring

Real Time Driver Drowsiness Detection | [GitHub](#) Jan 2025 - Mar 2025

- Developed an **AI-based fatigue detection system** for **real-time monitoring** of drivers.
- Implemented **facial recognition, blink detection, and head movement analysis** for **97% accuracy**.
- Optimized deep learning models for **Raspberry Pi**, reducing latency to **<100ms**.

CERTIFICATIONS

AWS Certified Cloud Practitioner | [CERTIFICATE](#) Aug 2024 - Aug 2027
Machine Learning & AI – Udemy | [CERTIFICATE](#) Feb 2025
Deep Learning & Computer Vision – Udemy | [CERTIFICATE](#) Mar 2025

EXTRACURRICULAR & LEADERSHIP

Winner - Ideathon by Apple Developers Group (VIT) Sep 2022
Winner - Vellore District Women's Football Tournament Mar 2023
Co-Secretary of Society for Industrial and Applied Mathematics Aug 2025
Bharatanatyam Dancer 15+ Years of Experience
